## “TANKS” A MILLION!

Dear Customer,

We're proud of our progress this year in all our services, especially stormwater: we completed construction of a one million gallon combined sewer overflow (CSO) tank that will capture sewage that currently goes into the Kennebec River during major rain events. It's a critical part of our ongoing efforts to comply with DEP stormwater regulations. Since 1989, the District has reduced CSO volume by 85%, and the new tank should help improve on this.

We look forward to serving you in 2020, and thank you for your support!

—The GAUD Team

## KEEP AN EYE ON YOUR PIPES!

Many of us were caught off guard by the early freeze this year, and have had to do damage control on frozen pipes, and even fire hydrants. Keep in mind that temperatures will likely go even lower, so don't let up on your freeze-proofing efforts. Here's a complete guide to keeping pipes from freezing: [CRWater.com/Prevent-Frozen-Pipes/](https://www.crwater.com/prevent-frozen-pipes/)

The good news: spring is less than four months away!
